Overview

Imperial College London's new programme in Applied Paediatrics (PG Cert/PG Dip/MSc) is a fully online, part-time degree delivered by academics and clinicians to provide a blend of knowledge that facilitates application to practice.

With an innovative structure and multidisciplinary approach, it aligns to career pathways, including acute paediatrics, specialist paediatrics, and neonatology.

It is designed to enhance students' understanding of the scientific and evidence base of paediatrics, research methodologies and advances, the health trajectories of children, population-based child health and ethics.

The programme is ideal for all those working with children and young people in a professional capacity, and we welcome allied health care professionals in paediatrics as well as nurses and doctors to apply.

Careers

As a graduate of this course, you will possess valuable real-world skills and the ability to innovatively apply your learning to complex problems within your professional life.

With the knowledge, understanding and contacts you gain through this study programme, you will be far better placed to achieve your career goals.

Next steps

For more information, visit our [website](#) or read more in our [Programme Specification](#). You can also watch videos [introducing the course](#) and our recent [Open Day](#).

Applications

If you are ready to make an application, you can [apply online](#). Most postgraduate courses remain open until they are full, though popular courses tend to close early, so make sure you apply in good time. As a guide, visa nationals (overseas applicants) should aim to apply by no later than 30 June 2022.
